Eres Biotechnology – Full Stack Developer

June 2021 – August 2022 Aydın/Turkiye

- During my work, I set up remote connections to a Linux Server and performed the devOps process of WordPress sites. I used tools such as Debian Server, Nginx, Php, Bash
-

Some Projects

Php Base Frame

- Php Base Frame is an MVC based Php framework with it's own routing system. I developed this Project as guide for MVC and OOP beginners.
- Source: <https://github.com/ozgurvurgun/php-base-frame>

OOPHP

- Skeletal structure that provides a clean implementation of the object-oriented programming approach for Php.
- Source: <https://github.com/ozgurvurgun/oophp>

Corder Restaurant Order Management

- Modular restaurant order management system and terminal
 - Source: <https://github.com/ozgurvurgun/corder-restaurant-order-management>
-

Some of My Projects in the Product Environment

- <https://vincendustri.com> (A CMS that allows product entry, exit and management)
- <https://github.com/ozgurvurgun/mips-assembly> (I teach Turkish assembly)
- <https://fikrininyeri.online> (Order management system)
